Welcome!

Welcome to the Community Food Systems Conference – exploring the intersection of food security, social justice, and sustainable agriculture. New Entry Sustainable Farming Project is pleased to host this event with the help of many supportive partners, generous sponsors, and dedicated staff. We are honored to engage in important discussions around food systems work with a slate of speakers and presenters who are each bringing a great wealth of knowledge and experience.

So many conferences and gatherings touch upon various aspects of food systems work. Amazing organizations and groups are convening valuable training and learning opportunities, which have been and continue to be a great source of inspiration. In particular I’d like to recognize the Community Food Security Coalition (CFSC). Although no longer in operation, CFSC’s impact has been long-lasting and a launching point in many ways for the Community Food Systems Conference. I am constantly awe-struck by the many individuals affecting change and dedicating their lives to this work. I’d like to take a moment to remember Gus Schumacher who passed away this September. His contributions to the Wholesome Wave Foundation, USDA, and World Bank, to name just a few, impacted and inspired countless people over his long and fruitful career. He will be missed but his legacy lives on. I’d also like to acknowledge the racial disparities found in this work. Diversity and inclusion have been a cornerstone throughout the planning of this conference, but there is always room for improvement and more could be done to ensure diverse voices are heard. I would be remiss not to call this out and want to partake in the accountability to move the needle in this regard.

Winona LaDuke,
Award-winning environmentalist and political activist

Wednesday 12/6 at 4:00 pm in the Grand Ballroom
LaDuke is an American who “tells the truth,” dedicated to her work on sustainable development, renewable energy, and food systems. Fighting bad investments and greed. Muster a resistance to ride for Indigenous communities reclaiming their land, their seeds, their stories, their ways. She follows her mother and father’s footsteps as an activist pushing for native economic and environmental development. Her story includes reclaiming a thousand acres of the more than 30,000 taken from the tribe long ago.

Today she teaches us her ancestors’ message, “Prepare for the next seven generations,” which is counter to our current culture. As LaDuke has stated, “The essence of the problem is about consumption, recognizing that a society that consumes one third of the world’s resources is unsustainable. This level of consumption requires constant intervention into other people’s lands. That’s what’s going on.”

PLENARY PANEL

The plenary panel will take place Thursday 12/7. Panelists include Malik Yakini, Co-Founder and Executive Director of the Detroit Black Community Food Security Network; Aleya Fraser, Farmer & Educator, founder of Black Dirt Farm Collective; Suzanne Adely, Northeast Regional Organizer at Food Chain Workers Alliance, a lead organization of the HEAL Food Alliance; and will be moderated by Andy Fisher, Co-Founder of the Community Food Security Coalition and author of Big Hunger. The panel will explore the intersection of food security, social justice, and sustainable agriculture.
